Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Introduction

1. The indicated allowability of claim 3 is withdrawn in view of the newly discovered reference(s) to Hyde, Jr. (U.S. 2,778,520). Rejections based on the newly cited reference(s) follow.
2. In view of the new grounds of rejection for claims 1, 3 and 10-12, this action is NON-FINAL.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 recites the limitation "said first and second handle portions" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 4-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Whitehouse (U.S. 3,927,796). Whitehouse teaches a closure apparatus, shown in figures 1-6, having a cap portion at 26 and a handle at 34. The peripherally depending side wall is shown at lead line 26 in figure 1 and

Art Unit: 3727

the radially inwardly extending peripheral lip is element 32. The lip 32 is considered a peripheral lip because it is an element of the periphery and extends from the periphery of the closure.

7. Claims 1, 3 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hyde, Jr. (U.S. 2,778,520). Hyde, Jr. teaches a closure apparatus having a cap portion and handle 10. The cap portion has a top 6 and side wall 7. The peripheral lip is shown below lead line 7 in figure 3. The fulcrum portion of the handle is the portion of the handle which extends below the peripheral lip, as shown in figure 2. The depending skirt is the portion of element 7 which extends below the peripheral lip. In col. 2 lines 9-11, Hyde, Jr. teaches that the cap may be reused.

Response to Arguments

8. Applicant's arguments filed October 3, 2003 have been fully considered but they are not persuasive. Claims 1, 13 and 14 has been amended to set forth that the peripheral lip "engages an entire circumference of said bead undercut". The wording of this limitation does not require that the peripheral lip be annular and engage the entire circumference simultaneously. This limitation merely requires that the peripheral lip be capable of engaging a container bead along it's circumference. The peripheral lip of Whitehouse can engage any point along the entire circumference.

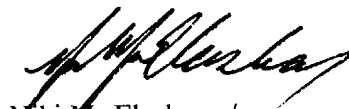

Conclusion

9. This Action is Non-Final.

10. In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses to Office Actions directly to (703)872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX will be promptly forwarded to the examiner.
